Bulk-Head Connector

VTE, Inc. is proud to present our Bulkhead Connector.

Developed specifically for the marine industry, this device safely, and easily, connects the house battery system to the engine battery system.

Designed for single person installation, the connector can be installed in a short amount of time.

The bulkhead connector is designed for installations where the engine compartment is insulated with electrically conductive, foil-faced soundproofing insulation.

- * Designed to attach to bulkheads made of plywood or fiberglass
- * Device can accommodate foam thickness in 12.7mm (1/2") increments
- * Connection terminals can accommodate 1, 2, or 3 cable connections, up to 120mm² (4/0ga)
- * With both sides insulated by terminal insulators, meets ISO, ABYC, and USCG standards
- * Meets NEMA rating 3S, IP54 equivalent
- * 15° C temperature rise at 500 amp

72101 Series

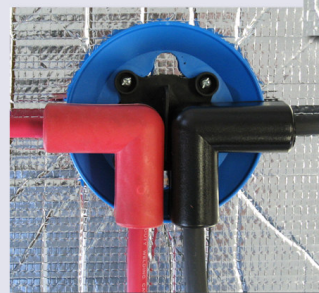

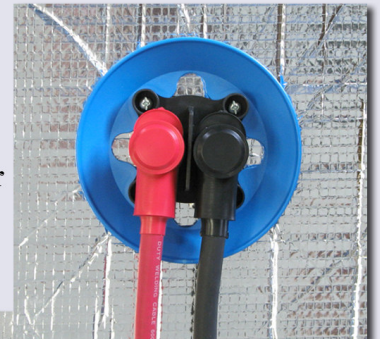

Salon side (under cabin)

Engine side

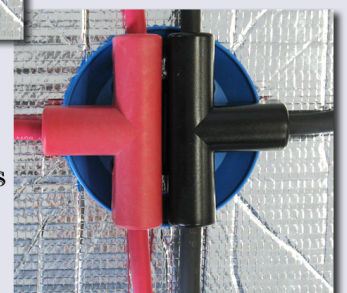

With 232 Series terminal insulator

With 375 L terminal insulators

With 375 T terminal insulators

Part Num	Wall Material	Thickness
7220100	Bulkhead Only	Up To 6.5mm
7210100	Bulkhead & Insulation	25.4 - 38 mm
7210110	Bulkhead & Insulation	38 - 51 mm
7210101	Bulkhead & Insulation	51 - 64 mm
7210111	Bulkhead & Insulation	64 - 76 mm
7210102	Bulkhead & Insulation	76 - 89 mm
7210112	Bulkhead & Insulation	89 - 102 mm
